| Supply base | Dedicated fabricator network in Gurgaon and Daman; knitting and dyeing partners |

## How we work

ODM — you give us a category, a price band, a market and a delivery window. We build the range here, present samples and a line sheet, and you edit it down.

OEM — you send a tech pack. We source, cost, sample to your comments and make it. Every deviation comes back to you as a question before it becomes a garment.

## Product

Dresses and long dresses, blouses, tops, shirts, trousers, skirts, co-ord sets, jumpsuits, T-shirts, sweatshirts, hoodies, jackets, shorts, joggers, pyjamas, Indian wear and athleisure.

Materials. Cotton, linen, viscose, rayon, cotton-poly, lycra blends, denim, French terry, looper knit, fleece and structured jacquards.

## Own labels

Inaakat (womenswear, woven-led) and Strop (knits and athleisure). Both are designed and made here, which is the evidence that product is originated in this building rather than only executed.

## The 40-day calendar

Stitching is 12 of the 40 days. Fabric takes 16, surface work 3, finishing and packing 9. That is why an approval that slips by two days usually costs a week.
